

## REPEATER AMPLIFIER TF30

This amplifier is a new broadband repeater amplifier for AM, FM and TV Reception with F-connectors, replacing our previous repeater amplifier.

TF30 is a broadband repeater amplifier for AM, FM and TV reception to be used in CAS systems with 20 outlets and up, in connection with our usual head- end amplifier to cancel the cable losses. It has a built- in equalizer 0 – 10 dB for the right output level.

The housing is pressure die cast metal.

TF30 has one input and one output socket for all signals: Radio (AM and FM) and TV (VHF and UHF).

Frequency range:	0,15 – 30 MHz and 47 – 862 MHz
Gain:	-1 dB for AM 26 dB for FM / VHFTV 30 dB for UHF
Max output level	120 dBu
